Quality and Safety Policy Statement

The management of AVM BV strives to run a sustainable and healthy business in which quality, safety, craftsmanship, reliability, customer focus and employee wellbeing form the basis of all our activities.

We design (where applicable), manufacture and install steel structures, pipework, transport and storage systems, handling and logistics systems for liquids and solids, and engineering structures. In doing so, we supply products and services that meet the agreed quality requirements, our customers' expectations and all applicable laws and regulations.

Our integrated management system complies with the requirements of:

- **ISO 9001:2015** – Quality management;
- **VCA ** 2017:6.0** – Health, Safety and Environment;
- **ISO 3834** – Quality requirements for fusion welding of metallic materials;
- **EN 1090** – Fabrication of steel structures and CE marking, certified for **Execution Classes EXC2 and EXC3.**

By integrating these standards, we ensure the controlled execution of our work, a high standard of quality and a safe working environment.

We are committed to:

- fully complying with applicable laws and regulations, standards and contractual obligations;
- delivering high-quality products and services that meet our customers' requirements and expectations;
- continuously improving customer satisfaction;
- to identify and manage risks in a timely manner and to make the most of opportunities for improvement;
- to create safe and healthy working conditions in which accidents, incidents, occupational illnesses and property damage are prevented as far as possible;
- to prevent environmental pollution and continuously reduce the environmental impact of our activities;
- to use raw materials, energy and other materials in a responsible and sustainable manner;
- to continuously develop the skills, professional competence and safety awareness of our employees;
- to work exclusively with suppliers and subcontractors who endorse our quality and safety objectives;
- to foster an open corporate culture in which employees actively report improvements and unsafe situations.

For our welding work, we guarantee that only qualified welders, approved welding procedures (WPS), qualified welding coordination and suitable materials are used, in accordance with the requirements of ISO 3834 and EN 1090. This enables us to meet the high quality standards required for steel structures up to and including **Execution Class EXC3.**

Our organisation operates in accordance with the Plan-Do-Check-Act (PDCA) cycle and applies risk-based thinking. Each year, during the management review, measurable objectives are set and evaluated in the areas of quality, safety, health, the environment, customer satisfaction, process optimisation and the development of our staff.

By continuously investing in quality, safety, innovation and craftsmanship, AVM BV aims to remain a reliable partner for its clients and to be a safe, sustainable and forward-looking organisation for staff, customers and other stakeholders.

Craftsmanship and technical quality

AVM BV strives for a high level of craftsmanship across all disciplines within the organisation. That is why we continuously invest in the professional competence of our staff, the qualifications of our welders and welding processes, the calibration and maintenance of our production equipment, and the use of the correct materials and working methods.

We ensure that all work is carried out by qualified personnel, in accordance with approved procedures, applicable standards and project-specific requirements.

Continuous improvement

Each year, the management sets measurable quality, safety and environmental targets and reviews these during the management review. This process utilises the Plan-Do-Check-Act (PDCA) cycle and risk-based thinking.

Our objectives include:

- continuous improvement of the quality of our products and services;
- error prevention and reduction of repair and failure costs;
- optimisation of production and welding processes;
- further digitalisation and more efficient work planning;
- improving safety and safety awareness;
- minimising our environmental impact;
- sustainable collaboration with customers, suppliers and subcontractors;
- continuous development of our employees' knowledge, craftsmanship and skills.

Health, Safety and Environment (HSE)

In the field of Health, Safety and Environment, AVM BV strives to:

- prevent workplace accidents, incidents and near-misses;
- prevent personal injury to employees, subcontractors and third parties;
- the prevention of occupational diseases;

- the protection of equipment, installations and property;
- the prevention of environmental pollution and the minimisation of the environmental impact of our activities;
- the promotion of safety awareness, open communication and a culture of reporting within the organisation.

Employees, suppliers and subcontractors

The success of our quality and safety policy depends on everyone's commitment.

That is why we invest in training, instruction, professional competence and awareness amongst our employees. Every employee is expected to contribute actively to quality, safety and continuous improvement.

We also expect our suppliers and subcontractors to meet the same high standards in terms of quality, safety and the environment. Their performance is assessed periodically as part of our collaboration.

Management Statement

The management of AVM BV is committed to making the necessary resources available to implement this policy, to periodically assess the performance of the management system, and to continuously work towards improving our processes, products, services and organisation.

Through this policy, we aim to be a reliable partner for our customers, a safe employer for our staff and a socially responsible company for the future.
